Courses
- CSE

PERSONAL PROJECTS

Online Shopping Website (08/2022 - 12/2022)
- Tech Stack :- MERN.
- I built a full-featured e-commerce website with everything from order booking to order monitoring, etc.
- I've also utilised nodemailer, which allows users to easily click on Forgot Password and receive mail to their id if they've forgotten their password.
- Additionally, there is an admin dashboard where users who are administrators can control users, orders, and other things.

Attendance Management System (01/2023 - 03/2023)
- Tech Stack:- React,CSS,HTML,Javascript.
- I got the chance to work on the creation and implementation of an attendance management system, which was essential in streamlining and automating an organization's attendance tracking procedure.
- I actively participated in every stage of the software development lifecycle as a crucial team member, from requirements gathering and system architecture design to coding, testing, and deployment.
